Bruce Bayne, Planning and Zoning Official

Date: July 3, 2019 at 1:50 p.m.
The May 13, 2019 Planning and Zoning Commission Meeting was called to order by Vice Chair Waltemate at 7:07 p.m.

**Roll Call:** Commissioners Jackie Hutchison, Whitney Springston, and Vice Chair Ray Waltemate were present. Chairwoman Janet Gregory was absent.

**Action Items**

**A. Consider approving minutes of April 8, 2019 regular meeting and April 15, 2019 special meeting.**

**Motion:** Motion by Commissioner Springston to approve the minutes for the regular and special meeting was seconded by Commissioner Hutchison and carried unanimously.

**B. Consider approving a design review permit for Middleton Physical Therapy at 1020 W. Main Street, Middleton, Idaho. The subject property is located along the Eastern boundary in Wellstone Business Park.**

Vice Chair Waltemate called the agenda item and asked if there was anyone representing the project in the audience who would like to speak. Bret Bishop the contractor for the project, gave a brief history of the owner of the clinic and the design of the building.

**Motion:** Motion by Commissioner Springston to approve the design review was seconded by Commissioner Hutchison and carried unanimously.

**C. Consider recommending city council approve the preliminary plat for Middleton Cemetery No. 3 (Third Addition).**

Vice Chair Waltemate called the agenda item and Planning and Zoning Official Bruce Bayne gave a short staff report. Carl Porter from Sawtooth Surveying then gave a very brief overview of the application and the request.

**Motion:** Motion by Commissioner Hutchison to approve the application was seconded by Commissioner Springston and carried unanimously.

**D. Public Hearing: Consider recommending city council approve Ordinance No. 620 of the City of Middleton, Canyon County, Idaho, amending Title 5 of the Middleton city code updating the general zoning provisions, modifying and updating the sues and notes in the land use, setback and area tables, updating preliminary and final plat requirements; updating design and development standards; updating required road and utility improvements;**
deleting standards for mobile home parks; making other minor modifications and providing an effective date.

Vice Chair Waltemate called the agenda item and opened the public hearing at 7:23 p.m. before City Attorney Chris Yorgason read through the purposed changes to the Middleton City Code.

James Gray stated that the R-3 requirements should stay consistent and not be bent for developers and that the developers need to help pay for intersections that their traffic directly impacts such as Duff and Highway 44.

Mike Graefe agreed with Mr. Gray and stated that the rules and regulations of the city need to be followed and if the developers do not want to build in the city limits then so be it.

Vice Chair Waltemate declared the public hearing closed at 8:06 p.m., a brief Commission discussion followed.

Motion: Motion by Commissioner Springston to recommend City Council approve Ordinance No. 620 with the exception of section 5-4-11-2 paragraph A which needs to have further clarification regarding R-2 and R-3 zoning was seconded by Commissioner Hutchison and carried unanimously.

Public Comments, Commission/Staff Comments: none.

Adjourn

Vice Chair Waltemate adjourned the meeting at 8:21 p.m.

ATTEST: Janet Gregory, Chairwoman

Dawn M. Dalton, Deputy Clerk
Approved: June 10, 2019
APPLICATION SUMMARY

An application from Mineral Rights Leasing ID LLC for preliminary plat approval of Crescent Lake Subdivision. The proposed preliminary plat consists of 105 single-family dwellings on approximately 35.13 acres of vacant land located South of The Lakes Subdivision – Phase 1 on the West side of Kingsbury Road.

Applicant: Mineral Rights Leasing ID LLC
2001 S Main St #2000
Salt Lake, Utah 84111

Representative: KM Engineering LLP – Sabrina Durtschi
9233 W State Street
Boise, Idaho 83714

1. **APPLICATION:** The application was accepted by the City on June 21, 2019.

2. **NOTICE OF THE SUBDIVISION:**
   - Letters to Agencies: June 21, 2019
   - Letters to Owners of Property within 300': June 21, 2019

3. **APPLICABLE CODES AND STANDARDS:**
   - Idaho Code 67-6512
   - Middleton City Code (MCC) 1-14-2, 1-15-1, and 5-4-4

4. **PLANNING AND ZONING REVIEW COMMENTS:**

   The subject property was annexed in 2005 and is zoned R-3, three residential units per gross acre. The proposed preliminary plat complies with that zoning density standard.

   Proposed lots range in size from 8,012 to 18,996 square feet. As currently displayed the 75 feet of frontage required along a publicly-maintained road cannot be confirmed.

   Road names comply with MCC 5-4-10-2,J.2, except one plan sheet shows Riley Ave. in the same location as Contorta Point Ave on another plan sheet and Cornell Street, which needs to be labelled and is along the South boundary of the subdivision.
Cluster mailboxes are required according to the attached correspondence from the Middleton Post Master and the United States Postal Service regional office and are not shown on the preliminary plat.

MCC 5-4-3 requires developer to prepare and submit for city approval a traffic analysis and payment of proportionate share of traffic impact intersections. As this subdivision was once a part of a larger development the traffic improvements and prorated share has previously been determined and the requirements shall be completed by this subdivision.

**City Planning and Zoning Review Comments:** See attached red-lined plans dated June 27, 2019.

**City Engineer Review Comments:** See attached red-lined plans dated June 28, 2019.

**Written Agency Responses Received to Date:** none.

**Written Comments From Landowners Received to Date:** There have been 19 landowners who have submitted letters to the city in opposition to this subdivision, with the following areas of concern:
- Crescent Lake owners using other HOA amenities
- Domestic water well capacity and added use
- Development consistency with the surrounding area
- Crescent Lake subdivision having access to The Lakes and Lakes at Telaga
- Loss of benefit or bargain
- Devalue of homes in adjacent subdivisions
- Greenspace and parks promised by previous developments
- Additional traffic
- Schools
- Adjacent land owners purchasing in this area because of the larger lot sizes
- Promises made by previous developers, 70 additional homes

Two of those 19 has since sent a revised letter in support of this subdivision. Several people have inquired at city hall to see the proposed plat.

5. **CONCLUSION**

The proposed preliminary plat complies with most of the city's code and standards. If the Planning and Zoning Commission recommend that the City Council approve the preliminary plat, it is recommended to be with the following conditions.

1. City of Middleton municipal domestic water, fire flow and sanitary sewer services are extended to serve the subdivision.
2. Show cluster mailbox location(s) on the plat (not by note).
3. Developer prepares and submit for city approval and payment of proportionate share of traffic impact at all required intersections: Cornell Street roundabout, Kingsbury Road and State Highway 44. Design and construct right and left turn lanes from...
Highway 44 onto Kingsbury Rd. Dedicate right-of-way for traffic-control improvements at the Kingsbury / Cornell intersection. Pay $125,000 to the City of Middleton as pro rata share of Kingsbury / Cornell intersection for the approximate 160 acre development, aka Lakes at Telaga and the Lakes, which obligation has been assumed by development of this 35.13 acre project. Design and construct improvements to Kingsbury Road as required by Canyon Highway District No. 4.

4. The applicant shall confirm 75’ minimum lot frontages, measured at the building setback line per city code.

5. Build a city street connection to The Lakes and Lakes at Telaga subdivisions so that those subdivisions have two code required access points.

6. Corrections identified by the City Engineer and Planning and Zoning Official are made.

RE: Preliminary Plat Application for Crescent Lake Subdivision

Dear Planning Staff,

On behalf of my Client Mineral Rights Leasing ID LLC, I have the pleasure of submitting Crescent Lake Subdivision a Preliminary Plat Application. The site is located at 23223 Kingsbury Road just south of The Lakes Subdivision. This application has been submitted per the standards set forth in the City of Middleton Idaho City Code and the Middleton Supplement to ISPWC.

Subject Site and Preliminary Plat

As noted, this site is located south of the recorded subdivision The Lakes. This will be a continuation of an area that has been re-developing into single-family residential lots. Between The Lakes Subdivision and our proposed subject site is a drain ditch that creates an adequate buffer and transition to our site.

Crescent Lake subdivision is approximately 35.13 acres and will consist of 105 single-family lots that meet the existing R-3 zoning standards, with an average lot size of 8,901 s.f.

Crescent Lake Subdivision will take access off of Kingsbury Road, the plat will also dedicate 50’ right-of-way along the south boundary for any proposed future road extension. All Interior streets will meet all local road standards, with attached curb, gutter and sidewalk.

Sewer will be connected via the existing northern manhole located in The Lake Subdivision. Water will be connected through Fountain Ave to an existing water easement to public services.

The subdivision has been designed to retain water on site. Drainage run-off will be collected along the Kingsbury Road via retention swales, additionally collection points will be provided by two storm drain ponds within the site. The site will provide pressurized irrigation to the entire subdivision.
Crescent Lake Subdivision design will exceed the open space requirement by providing 12.15% of open space. The ponds will provide double purpose for drainage collection and an amenity with walking paths, sitting benches, and a covered picnic area. Crescent Lake Subdivision open space amenity will provide a thoughtful well-designed open space for neighbors to gather and enjoy the open setting.

Summary

Crescent Lake Subdivision will provide a quality single-family subdivision to a area that has been re-developing over the years. With a range of lot sizes within our application, it will help provide the community of Middleton a variety of housing options. We look forward with working with staff on this application and if you need anything, please do not hesitate to contact me at 208-639-6939 or at sdurtschi@kmenglp.com.

Thanks for your help with this application,

Sabrina Durtschi

Legal Description

A parcel of land situated in a portion of the South 1/2 of the Southeast 1/4 of Section 3, Township 4 North, Range 2 West, Boise Meridian, City of Middleton, Canyon County, Idaho and being more particularly described as follows:

Commencing at a found aluminum cap monument marking the East 1/4 corner of said Section 3, thence following the easterly line of the Southeast 1/4 of said Section 3, S01°18'13"W a distance of 2,632.18 feet to a found aluminum cap monument marking the Southwest corner of said Section 3, thence leaving said easterly line and following the southerly line of said Southeast 1/4, S89°46'17"W a distance of 50.02 feet to a found 5/8-inch rebar on the westerly right-of-way line of Kingsbury Road and being the POINT OF BEGINNING.

Thence leaving said westerly right-of-way line and following said southerly line, S89°46'17"W a distance of 2,589.79 feet to a found 5/8-inch rebar marking the South 1/4 corner of said Section 3;

Thence leaving said southerly line and following the westerly line of said Southeast 1/4, N01°20'32"E a distance of 301.67 feet to a found 5/8-inch rebar marking the Southwest corner of The Lakes Subdivision Phase 1 (Book 44, Page 19, records of Canyon County, Idaho);

Thence leaving said westerly line and following the boundary of said The Lakes Subdivision Phase 1 the following fourteen (14) courses:

1. N68°46'53"E a distance of 617.95 feet to a found 5/8-inch rebar;
2. N73°30'24"E a distance of 685.36 feet to a found 5/8-inch rebar;
3. N89°04'53"E a distance of 45.09 feet to a found 5/8-inch rebar;
4. S80°12'49"E a distance of 117.69 feet to a found 5/8-inch rebar;
5. N05°19'21"E a distance of 188.64 feet to a found 5/8-inch rebar;
6. 62.01 feet along the arc of a circular curve to the left, said curve having a radius of 70.01 feet, a delta angle of 50°45'14", a chord bearing of S84°42'55"E and a chord distance of 60.01 feet to a found 5/8-inch rebar;
7. S05°19'21"W a distance of 193.37 feet to a found 5/8-inch rebar;
8. S80°12'49"E a distance of 142.38 feet to a found 5/8-inch rebar;
9. S81°40'49"E a distance of 450.04 feet to a found 5/8-inch rebar;
10. S83°33'11"E a distance of 124.23 feet to a found 5/8-inch rebar;
11. N83°43'48"E a distance of 122.99 feet to a found 5/8-inch rebar;
12. N74°12'26"E a distance of 105.44 feet to a found 5/8-inch rebar;
13. N62°43'39"E a distance of 114.94 feet to a found 5/8-inch rebar;
14. N44°19'02"W a distance of 160.41 feet to a found 5/8-inch rebar on said westerly right-of-way line;

Thence leaving said boundary and following said westerly right-of-way line, S01°18'13"W a distance of 786.48 feet to the POINT OF BEGINNING.

Said parcel contains 35.134 acres, more or less.

RE: Preliminary Plat Application for Crescent Lake Subdivision

Dear Planning Staff,

On behalf of my Client Mineral Rights Leasing ID LLC, I have the pleasure of submitting Crescent Lake Subdivision a Preliminary Plat Application. The site is located at 23223 Kingsbury Road just south of The Lakes Subdivision. This application has been submitted per the standards set forth in the City of Middleton Idaho City Code and the Middleton Supplement to ISPWC.

Subject Site and Preliminary Plat

As noted, this site is located south of the recorded subdivision The Lakes. This will be a continuation of an area that has been re-developing into single-family residential lots. Between The Lakes Subdivision and our proposed subject site is a drain ditch that creates an adequate buffer and transition to our site.

Crescent Lake subdivision is approximately 35.13 acres and will consist of 105 single-family lots that meet the existing R-3 zoning standards, with an average lot size of 8,901 s.f.

Crescent Lake Subdivision will take access off of Kingsbury Road, the plat will also dedicate 50’ right-of-way along the south boundary for any proposed future road extension. All interior streets will meet all local road standards, with attached curb, gutter and sidewalk.

Sewer will be connected via the existing northern manhole located in The Lake Subdivision. Water will be connected through Fountain Ave to an existing water easement to public services.

The subdivision has been designed to retain water on site. Drainage run-off will be collected along the Kingsbury Road via retention swales, additionally collection points will be provided by two storm drain ponds within the site. The site will provide pressurized irrigation to the entire subdivision.

Your Narrative Says Water Will Be Connected To Public Services, However Plan PP3-O States "Domestic Water Service Will Be Provided By The Lakes Subdivision HOA."
Crescent Lake Subdivision design will exceed the open space requirement by providing 12.15% of open space. The ponds will provide double purpose for drainage collection and an amenity with walking paths, sitting benches, and a covered picnic area. Crescent Lake Subdivision open space amenity will provide a thoughtful well-designed open space for neighbors to gather and enjoy the open setting.

Summary

Crescent Lake Subdivision will provide a quality single-family subdivision to a area that has been re-developing over the years. With a range of lot sizes within our application, it will help provide the community of Middleton a variety of housing options. We look forward with working with staff on this application and if you need anything, please do not hesitate to contact me at 208-639-6939 or at sdurtschi@kmengllp.com.

Thanks for your help with this application,

Project No: 19-070
ADMINISTRATIVE REVIEW AND REPORT

Middleton Planning and Zoning Commission

Earle M. Jorgensen (EMJ) Building

SUMMARY OF APPLICATION

An application by Middleton Industrial Park, LLC as landowner for a design review permit for a new building on Lot 3 of Block 1 of the Middleton Industrial Park No. 1 Subdivision, commonly referred to as 21817 Cobalt Ave., Caldwell, Idaho, west of Middleton Road south of Bass Lane. The building’s tenant EMJ is a subsidiary of Reliance Steel and Aluminum Company, the largest Metals Service Center company in North America.

Applicant: Middleton Industrial Park, LLC
11299 Bass Lane
Caldwell, Idaho 83605

Representative: Jo Greer
Rule Steel
11299 Bass Lane
Caldwell, Idaho 83605

1. APPLICATION: The application was accepted by the City on June 27, 2019.

2. APPLICABLE CODES AND STANDARDS: Middleton City Code (MCC) 1-15-8

3. PLANNING AND ZONING REVIEW COMMENTS:

A. The Earle M. Jorgensen (EMJ) Building will be a new building located at 21817 Cobalt Ave., Middleton, Idaho. The subject property is zoned M-1, Light Industrial, less intense industrial and manufacturing uses are allowed in that zone.

B. Design review is required for all nonresidential structures and residential
structures containing more than three (3) residences (MCC 1-15-8-1). The intent of design review is to ensure harmony of the building and site with the community design elements of the city (MCC 1-15-8-5).

C. Plans, drawings and materials submitted comply with requirements in MCC 1-15-8-4, and indicate the building will be a large warehouse with roll-up doors on each end for trucks to enter the warehouse to load or unload products, when purchased online, will be shipped throughout North America.

D. Each building should contain three or more of the following community design elements: A-frame or gable, some stucco, brick or rock, vertical or horizontal metal siding or roofing, some timber work, and a public art feature (MCC 1-15-8-5).

1. **Community Design Elements.** The proposed structure has a gable, vertical metal siding, and metal roofing.

2. **Architectural Quality**
   - The building character for industrial use, initially is clearly defined by architectural features
   - Proposed materials, colors and signing continue the style of the other building in the subdivision
   - The lot will be fenced (MCC 4-4-1-D-4)
   - Exterior lighting will be shielded and downward facing
   - Garbage storage areas will be screen from public view and there are no satellite receivers proposed so screening them is not applicable
   - The project’s materials, colors and signing are compatible with the townscape, surroundings, and structures in the area.

3. **Circulation Design**
   - Driveway access is directly to Cobalt Ave. that connects to Bass Lane, then Middleton Rd., then Highway 44 or Highway 20-26.
   - The existing pedestrian and bicycle pathway along Bass Lane will connect to a pathway to be built by others along Middleton Road connecting the subdivision to River Park and downtown.

E. The applicant states “there will be approximately 3 employees in the new building,” however, the application states that the building can hold up to 99 occupants based on square footage. The warehouse is highly computerized and mechanized; customers generally will not be coming to the building. As such the building currently shows a total of nine parking stalls, eight regular and one accessible for Americans with Disabilities. This complies with city code (MCC 4-5-11 – industrial use).
4. **CONCLUSION**

All application materials were received. Building colors and materials are compatible with the surrounding neighborhoods and adjoining structures. The proposed new building includes gable and metal vertical siding "Aztec Blue" with "Polar White" trim and galvanized roofing metal Panel "Factory Finish;" it does not include some stucco, brick or rock, some timber work or a public art feature.

Parking requirements, vehicle and pedestrian traffic circulation comply with city code for three employees. The applicant needs to have marked Americans with Disabilities parking space(s) complying with city code.

This nonresidential building in this industrial subdivision, if constructed as proposed, complies with Middleton's design review standards.

Checklist - A complete Planning and Zoning Application must include the following.

☑ Application Form

☑ Application Fee (see Fee Schedule). Note: City Engineer and City Attorney expenses incurred by the city throughout the approval process that are related to relating to this Application are billed to the applicant in addition to the Application Fee. Applicant Initial

☑ Vicinity Map: attach an 8 1/2" x 11" map showing the subject property in relation to land around it that includes the nearest public roads.

☑ Narrative: describe and explain your request, anticipated adverse impacts on neighbors, and other information helpful to decision-makers. Please attach the following if applicable.

☐ Property Boundary Description including reference to adjoining road and waterway names that is signed and stamped by a land surveyor registered in the State of Idaho. If more than one zoning designation is being requested, separate legal descriptions are required for each zoning designation.

☐ Neighborhood Meeting: If applicable, attach original sign-up sheet.

☐ Mailing Labels: Adhesive mailing labels containing the names and addresses of property owners within 300 feet of the external boundaries of the subject property (available at Canyon County Assessor’s office or title companies). Two(2) sets if application requires a public hearing.

☑ Complete Application (City use only: check box and Initial if Application is complete): 85
Middleton City Code (MCC) Title 1 Chapter 15 requires an application and city approval of exterior design of all non-residential buildings.

RE: New Earl M. Jorgensen (EMJ) Building: 21817 Cobalt Avenue Design Review

To whom this may concern:

Rule Steel is pleased to be submitting for the Design Review application for the new Earl M. Jorgensen Company (EMJ) Building. The property is located at 21817 Cobalt Avenue, Caldwell, ID 83605, City of Middleton and is Lot 3 Block 1 of the Middleton Industrial Park (Final Plat recorded 2016-024374 Book 48, Page 27 Canyon County).

The intent of this application will be for the requested approval of the Design Review per the City of Middleton Planning & Zoning Department City Code 1-16-8-1 APPLICABILITY: A design review is required for all nonresidential structures and residential structures containing more than three (3) residences. (Ord. 588, 3-1-2017; amd. Ord. 609, 7-3-2018). The proposed structure consists of 25,200 SF of Warehouse (S-2 Storage) space and 1,500 SF of Office (B Business) space, and adjacent parking lot with 8 parking stalls and 1 accessible parking stall. The tenant- EMJ- warehouses raw metal product(s) and distributes to local customers. The building will be used Monday through Friday, from 8 a.m. to 5 p.m. The building can hold up to 89 occupants. The use is conducive to the M-1 Light Industrial zoning and will be a pre-engineered metal building structure. This type of structure is located on the north, east, and west (across Middleton Road) sides of the property boundaries; and agricultural use to the south. The building will be provided by Nucor; the main body color will be Aztec Blue with Polar White trim, and Galvalume metal roof (grey metal).

The site will meet the City of Middleton required amenities including: curb, gutter, sidewalk, and street lighting. Storm water retention and disposal will be handled entirely on site; which may be accomplished with valley gutters, swales, or culverts.

We kindly request your consideration for approval of this project as submitted. If you have any questions or require additional information, please do not hesitate to contact me.

Thank you so much for your time,
Have a great day!

Jo D Greer

Our Silicone Polyester paint is a two-coat system that utilizes cool coating technology and offers superior quality and durability.

Colors shown are representative of actual colors offered and are NOT intended for matching purposes. Exact color match should be made from metal color chip samples.

Initial Solar Reflectance (ISR) is the fraction of the total solar energy that is reflected away from a surface. To be considered "cool," products must have a Solar Reflectance of at least 0.75.

Initial Thermal Emissivity (ITE) is the relative ability of the roof panel to radiate absorbed heat.

Solar Reflectance Index (SRI) is calculated by using the values of solar reflectance, thermal emissance, and a median solar coefficient. The higher the SRI value, the lower its surface temperature and consequently, the heat gain into the building.

Gutters, downspouts, and downspouts are available as an upgrade. Gutterlife™ ratings are 0.80. Initial Solar Reflectance (ISR), 10 Initial Thermal Emissivity (ITE), and 55 Solar Reflectance Index (SRI).

Base single flash is available in Burnished Gold and Polar White only.

All Standard Silicone Polyester colors shown on this chart feature a 25-year finish warranty. Unpainted Galvalume™ panels feature a 25-year finishing guarantee. See literature for specific warranty information. (Warranties apply only to the finish coat of exterior mounted panels. Backer side primer colors may vary.)

The term "IRS" on the Nucor Order Document refers to "To Be Selected from Standard Nucor Silicone Polyester Colors." as shown on this chart.

In keeping with a continuing program of product improvement, all information contained herein is subject to change without notice.
**D-Series Size 1**

**LED Wall Luminaire**

**Specifications**

**Luminaire**
- **Width:** 13-3/4" (34.9 cm)
- **Weight:** 12 lbs (5.4 kg)
- **Depth:** 10" (25.4 cm)
- **Height:** 6-3/8" (16.2 cm)

**Back Box (BBW, ELCW)**
- **Width:** 13-3/4" (34.9 cm)
- **Weight:** 5 lbs (2.3 kg)
- **Depth:** 4" (10.2 cm)
- **Height:** 6-3/8" (16.2 cm)

For 3/4" NPT side-entry conduct (BBW only)

**Introduction**

The D-Series Wall luminaire is a stylish, fully integrated LED solution for building-mount applications. It features a sleek, modern design and is carefully engineered to provide long-lasting, energy-efficient lighting with a variety of optical and control options for customized performance.

With an expected service life of over 20 years of nighttime use and up to 74% in energy savings over comparable 250W metal halide luminaires, the D-Series Wall is a reliable, low-maintenance lighting solution that produces sites that are exceptionally illuminated.

**Accessories**

**Ship separately**
- DDBXD Dark bronze
- DDBXD Black
- DDBXD Natural aluminum
- DDBXD White

**Notes**
1. 20C 1000 is not available with PIR, PIRH, PIR1FCZV or PIR1FCZV.
2. MVOLT driver operates on any line voltage from 120-277V (50/60 Hz).
3. Single fuse (SF) requires 100, 277 or 347 volt option. Double fuse (DF) requires 208, 240 or 480 volt option.
4. Only available with 20C, 700mA or 1000mA. Not available with PIR or PIRH.
5. Back box ships installed on fixture. Cannot be field installed. Cannot be ordered as an accessory.
6. Photocell (PC) requires 120, 208, 240, 347 or 348 volt option. Not available with MVOLT option.
7. Reference Motion Sensor table on page 3.
9. Not available with PIR.
10. Not available with ELCW.
11. Also available as a separate accessory; see Accessories information.
12. Not available with ELCW.

Options and Accessories

- TM (left), ASTOF (right) lenses
- HS - House-side shields
- BSW - Bird-deterrent spikes
- WG - Wire guard
- VG - Vandal guard
- DDL - Diffused drop lens

FEATURES & SPECIFICATIONS

INTENDED USE

The energy savings, long life and ready-to-install design of the D-Series Wall Size 1 make it the smart choice for building-mounded downway and pathway illumination for nearly any facility.

CONSTRUCTION

Two-piece die-cast aluminum housing has integral heat sink fins to optimize thermal management through conductive and convective cooling. Modular design allows for ease of maintenance. The LED driver is mounted to the door to thermally isolate it from the light engines for low operating temperature and long life. Housing is completely sealed against moisture and environmental contaminants (IP65).

FINISH

External parts are protected by a zinc-infused Super-Durable TGIC thermoset powder coat finish that provides superior resistance to corrosion and weathering. A tightly controlled multi-stage process ensures a minimum 3.0 mil thickness for a finish that can withstand extreme climate changes without cracking or peeling. Available in textured and non-textured finishes.

OPTICS

Precision-molded proprietary acrylic lenses provide multiple photometric distributions tailored specifically to building mount applications. Light engines are available in 3000 K (70 min. CR), 4000 K (70 min. CR) or 5000 K (80 min. CR) configurations.

ELECTRICAL

Light engines consist of 10 high-efficiency LEDs mounted to a metal-core circuit board to maximize heat dissipation and promote long life (50,000 hours at 25°C). Class 1 electronic drivers have a power factor >90%, THD <20%, and a minimum 250V surge rating. When ordering the SP5 option, a separate surge protection device is installed within the luminaire which meets a minimum Category C2 load (per ANSI/IEEE C62.41.2). INSTALLATION

Included universal mounting bracket attaches securely to any 4" round or square outlet box for quick and easy installation. Luminaire has a slotted gasket wireway and attaches to the mounting bracket via corrosion-resistant screws.

LISTINGS
