

City of Middleton

# NOTICE

The City of Middleton will be performing preventative maintenance by cleaning the sanitary sewer lines in your area **June 7-11**

This will improve the sewer's performance and significantly reduce the chance for future sewer backups and related problems.

Sometimes this process causes water to flow into the residential drains and surface in toilets.

Each day during the period noted above:

- Run water through all drains and flush all toilets in the home.
- Keep toilet lids down, and if possible add 5 to 10 pounds weight to keep the toilet lid closed.

Please call City Hall with any questions or if you experience flows that go beyond the toilet.
